“ FORS has demonstrated that operators can reduce collisions and costs by over 30%. It’s this high level of risk management, combined with the robustness of the FORS Standard and the steps accredited operators take to mitigate road risk in their fleets that prompted DIG to create this exclusive offer for FORS members. We’re dedicated to helping our customers manage risk, so aligning ourselves with FORS seemed the ideal solution. ”

Over the years Direct Insurance Group Plc has provided my company with a service agreement that includes quarterly claims and business reviews at our offices. The review process has enabled us, for the first time, to have input into the settlement process and it has also highlighted trends, which in partnership with Direct Insurance we have devised and implemented strategies to address. The service received over the last 8 years has been excellent and I would highly recommend Direct Insurance Group Plc to companies who are considering using their expertise.
